

Australian Sandalwood Oil - Product Sheet

AUSTRALIAN SANDALWOOD (*SANTALUM SPICATUM*) OIL

APPLICATIONS

AROMATHERAPY

FRAGRANCE

INCENSE

If Indian sandalwood is the king of all woods, then Australian sandalwood is the undisputed prince. Whilst retaining the classic woody base note synonymous with sandalwood, Australian sandalwood has a greener, fresher top note than its Indian counterpart. The fragrant aroma of Australian sandalwood oil offers uplifting but calming benefits.

Our Australian sandalwood oil (known as *Santalum spicatum* or *Fusanus spicatus*) is steam distilled at our distillation facility, from small chips of the oil-bearing heartwood, grown in central-Western Australia by the government-regulated Forest Products Commission (FPC). We supply Pure Australian Sandalwood Oil and Pure Australian Sandalwood Oil-Organic Certified, and ensure every step of the process complies with organic standards recognised across the world. Once the trees arrive at our distillation facility, we ensure none of this precious resource is wasted. Every part from the roots to the stems is used to extract the golden, scented oil within.

We are committed to providing the highest quality sandalwood oil, as well as expertise in its use and production. Work with our team of specialists to create unique olfactory blends and chemical profiles that meet distinct specifications.

Species	<i>Santalum spicatum</i> (R.Br.) A.D.C (Western Australian Sandalwood)
INCI Name	Fusanus Spicatus Wood Oil Santalum Spicata Wood Oil
Synonyms	Fusanus spicatus, Eucarya spicata, Sandalwood oil - W.A.
Source	Wild harvest from Western Australia
Process	Steam distilled
Appearance	Clear, almost colourless to yellow, slightly viscous liquid
Main Constituent	12.3% - 18.4% alpha-santalol 4.3% - 6.5% beta-santalol
Odour Profile	Top note: organic, sweet, and diffuse Heart note: woody, slightly smoky and sweet Base note: warm and rich, balsamic woody It has a true sandalwood character throughout the whole chord, with a tenacious woody dry down
Shelf Life	This product can be stored for over five years. It should be stored within a temperature range of 0-40 degrees Celsius. The vessel must be tightly sealed following use

BENEFITS

For end consumer:

- Calms and relaxes the mind
- Woody heart note creates a balancing and pacifying effect

We are the global leader in the supply of premium and sustainable Indian and Australian sandalwood raw materials.

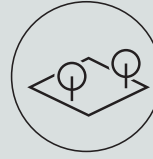

We have dedicated the past 20+ years to producing and advocating for an ethical supply of Indian sandalwood to combat the illegal poaching and harvesting of this ancient tree in India, which pushed supply to the brink and landed it on the International Union for Conservation of Nature's (IUCN) vulnerable species list in 1998.

Establishing our very first sustainable Indian sandalwood plantation in 1999, we now proudly own and manage the largest Indian sandalwood plantation in the world, spanning over 9,000 hectares across northern Australia and home to more than 3.5 million trees.

Our plantations are internationally recognised as Forest Stewardship Council® (FSC®) certified for forest management, reflecting the management of our sandalwood plantation estate in a way that preserves biological diversity and benefits the lives of communities, whilst ensuring we sustain economic viability.

As the world's leading supplier of sustainable premium Indian sandalwood and wild harvest Australian sandalwood, we distribute our high-quality, consistent, and globally-certified oil, logs, chips and powder to top brands within industries such as Fragrance, Cosmetics, Aromatherapy, Incense and Traditional Chinese Medicine.
