GROWER UPDATE

MIS PROJECT ACCOUNTS - FY19

The accounts for the year ending 30 June 2019 for the Indian Sandalwood MIS Projects managed by Sandalwood Properties Ltd, a Quintis Group company, are now available. The accounts have been audited by EY and all accounts have been lodged with ASIC.

These annual accounts include an outline of the work undertaken on your plantations and include a status report on the health of the plantations by an independent expert forester.

Copies of the audited annual accounts are available in the MIS Plantation Investor section of the Quintis website or via the link below.

As previously advised, the audited accounts do not include a valuation of your Indian Sandalwood trees. This is because the trees belong to you, the grower, and are not assets owned by the Project. Quintis is able to provide you with an estimate of the potential future value of your investment and the key assumptions required to assess the value. In order to obtain this information please email your request to info@quintis.com.au.
