

Indian Sandalwood Powder - Product Sheet

INDIAN SANDALWOOD (*SANTALUM ALBUM*) POWDER

APPLICATIONS

SKINCARE & COSMETICS

INCENSE

The suite of fragrant Indian sandalwood heartwood powders is created by grinding the heartwood of Indian sandalwood trees into fine particles of various sizes. Containing 3 – 4% Indian sandalwood oil, the heartwood powders are highly aromatic and smooth to the touch.

One of the oldest cosmetic ingredients in history, it is known as an essential ingredient in Ayurvedic applications for soothing and brightening skin tone. When applied on the skin, the powders feel light, powdery and smooth.

Indian sandalwood heartwood powder has also traditionally been used to create incense sticks, which are burned in rituals and religious practices.

Quintis Sandalwood produces high-quality Indian sandalwood heartwood powder products suitable for various applications. The Indian Sandalwood Extra Fine Powder is suitable for skincare and cosmetic applications. While Indian Sandalwood Heartwood Powders for incense are produced according to customer requirements.

Species	<i>Santalum album</i> L.
INCI Name	Santalum Album (Sandalwood) Wood Powder Santalum Album (Sandalwood)

About Quintis

QUINTIS
SANDALWOOD

Today's Best.
Tomorrow's Better.

We are the global leader in the supply of premium and sustainable Indian and Australian sandalwood raw materials.

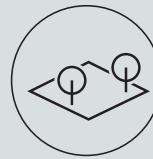

We have dedicated the past 20 years to producing and advocating for an ethical supply of Indian Sandalwood to combat the illegal poaching and harvesting of this ancient tree in India, which pushed supply to the brink and landed it on the International Union for Conservation of Nature's (IUCN) vulnerable species list in 1998.

Establishing our very first sustainable Indian sandalwood plantation in 1999, we now proudly own and manage the largest Indian sandalwood plantation in the world, spanning over 12,000 hectares across northern Australia and home to more than 5.5 million trees.

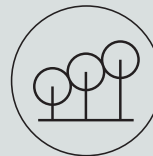

Our plantations are internationally recognised as Forest Stewardship Council® (FSC®) certified for forest management, reflecting the management of our sandalwood plantation estate in a way that preserves biological diversity and benefits the lives of local people and workers, whilst ensuring we sustain economic viability.

As the world's leading supplier of sustainable premium Indian sandalwood and wild harvest Australian sandalwood, we distribute our high-quality, consistent, and globally-certified oil, logs, chips and powder to top brands within industries such as fragrance, cosmetics, aromatherapy, incense and Traditional Chinese Medicine.
