

Indian Sandalwood Heartwood Powder

(Santalum Album®)

This fragrant powder is created by grinding pure Indian sandalwood heartwood. This process 'unlocks' the rich fragrance of the Sandalwood tree creating a very aromatic powder.

In cosmetics particularly, Indian sandalwood powder is an excellent emulsifier forming Pickering emulsions that can be stabilised using viscosity modifiers. It provides excellent skin feel on application and a soft powdery non tacky feeling on dry down due the spherical nature of the particles.

Customised to your specifications

The powder can be ground to a fine, medium or coarse powder. For larger orders we can customize to your specific requirements.

OVERVIEW

Species	<i>Santalum album</i> L. (Indian Sandalwood)
INCI name	SANTALUM ALBUM WOOD POWDER
Source	Plantation grown in northern Australia
Process	Powdered from pure album heartwood chips to specific mesh size
